Subject: RE: LDF Youth Center Below Grade Propane Tank

Hi Kristen,

The only information I was able to find is on our web site:

<https://www.epa.gov/sites/production/files/2013-11/documents/storage.pdf>

This guidance document is for much larger facilities that store and transport propane. I am not sure if there are any federal regulations for buried propane tanks.

Hi Kevin,

Can you direct me to any BMP or other helpful information for guidance on this. We are unfamiliar with buried propane tanks.

Kristen

Hi Kristen,

I am forwarding you an email response from Sherry regarding the 1000 gallon propane tank at the LDF youth center. In short, we do not regulate propane tanks at the federal level. Let me know if you have any questions.

No Propane is not a regulated substance because it is not at standard temperature or pressure

§280.12 Definitions.

Regulated substance means:

- (a) Any substance defined in section 101(14) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 (but not including any substance regulated as a hazardous waste under subtitle C), and
- (b) Petroleum, including crude oil or any fraction thereof that is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

The term “regulated substance” includes but is not limited to petroleum and petroleum-based substances comprised of a complex blend of hydrocarbons derived from crude oil through processes of separation, conversion, upgrading, and finishing, such as motor fuels, jet fuels, distillate fuel oils, residual fuel oils, lubricants, petroleum solvents, and used oils.

Arturo and Bob,

Please take a look at Kristin's email below regarding buried propane tanks. Are these regulated by us?

Good Morning Sherry,

The Tribe is working on building a new youth center. There is a proposal to bury a 1000 gallon propane tank. The contractor has advised that this is a common practice. Could you please direct us to technical assistance for the following two questions.

- 1) Are there federal regulations regarding below grade propane tank installations.
- 2) Are there and best management guidance available for below grade propane installations.

Hi Kristen,

Underground storage tanks are handled by a different Division. The contact for USTs in Indian Country is Sherry Kamke. She can be reached at kamke.sherry@epa.gov or at 312-353-5794. Hope that helps!

Jaime

Hi Jamie,

I am working on more information on the above ground tank we spoke of earlier this month, but now have a question on another property.

New Question

The Tribe is working on building a new youth center. There is a proposal to bury a 1000 gallon propane tank. The contractor has advised that this is a common practice. Could you please direct us to technical assistance for the following two questions.

- 1) Are there federal regulations regarding below grade propane tank installations.
- 2) Are there and best management guidance available for below grade propane installations.

Hi Jamie,

Attached are pictures of the former fuel shed, and tanks removed from the former fuel shed.
